Globalwave Technologies Pvt. Ltd.

Globalwave Technologies, an ISO 9001-2008 company, started operations as an international company in India, for the design and manufacture of flat panel antennas for Mobile and Fixed Wireless Applications such as Wireless Networking, Broadband Wireless Communication, Fixed Broadband Wireless Access (WiMAX, Wi-Fi) systems, RFID, SCADA and Utility Networks and, defense applications.

Taking flat panel antennas to a deeper dimension

Globalwave Technologies, with technical support from a world leading company with 40 years experience in the industry, operates from Kochi, South India.

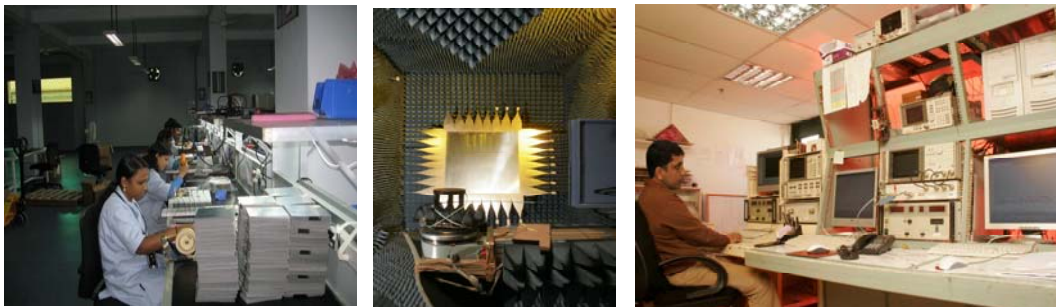

Globalwave Technologies offers a wide variety of off-the-shelf and customized, high performance antennas to meet your wireless connectivity needs. The company produces antennas ranging in frequencies from 100KHz to 90GHz. The company also offers solutions and products for new commercial applications as Public Safety, Advanced Metering Infrastructure (AMI), Mission Critical Communication and other wireless systems become increasingly prevalent in our lives.

Globalwave Technologies also provides cables and wiring for RF, command & control and, power applications.

Globalwave Technologies has recently expanded its services in more lines of business. The company has positioned itself as a one-stop-shop for clients who needs base in India.

Globalwave Technologies offers its build-to-print services to help foreign companies meet the ‘offset’ condition stipulated by the Indian Ministry of Defense for large Defense contracts. Besides sourcing, manufacturing and testing, we are capable of providing service support, both in the field and the lab.

Manufacturing & Testing: Lending new meaning to “State-of-the-Art”

Globalwave Technologies maintains antenna test ranges. We demonstrate exceptionally high capabilities in our development and manufacturing processes and have earned a credible reputation in the wireless arena for the thorough verification processes we employ with all of our products – including 100% VSWR and full systems checks conducted for every production lot.

Globalwave Technologies development arena is closely knit and synergistic. Our experienced R&D department, headed by engineers with vast experience in the wireless antenna field, is adjacent to our modern, state-of-the-art 1,800 square meters of production and testing facility.
